POD LEAD TOOL · L0/L1 INTAKE

Regional President Intake

FDE pods take cues only from L0 (CEO) and L1 (SLT) priorities. This conversation with your regional president sets your pod's capstone use case, so it should surface a real priority, the decision behind it, and what success looks like by January.

FIELD	DETAILS
Region	North America
Regional president	Reyna Thompson
Pod lead(s)	Herz, Nate - Schreier, Jonathan
Other attendees	Gilliam, Zak - Dockmeci, Ahmet - Small, Adam
Meeting date	

TIMING
Hold the meeting before Session 2 (week of Nov 2), where pods debrief their intake conversations. Capstone problems are locked in Session 3 (week of Nov 9).

Before the meeting

Request 30-45 minutes and share a two-line purpose note in advance (see below).

Review the region's current priorities, recent leadership communications, and anything the president has flagged publicly.

Draft two or three hypotheses about where a pod could help, but be ready to set them aside.

Agree with your FDEs on what they most need to learn to start discovery.

Suggested purpose note

"As part of the new FDE capability, our regional pod will spend the next three months on one of your highest-priority problems. I'd like 30-45 minutes to understand what matters most and what success would look like for you by mid-January."

DURING THE MEETING

Conversation Guide

Listen more than you talk. Capture the president's words, not your interpretation of them.

1 The priority

What problem or opportunity in the region would most move the numbers if we made better decisions about it? Why now?

2 The decision

If this were solved, what decision would change? Who makes it, how often, and with what information today?

3 The people

Who lives this problem day to day? Who should our FDEs sit with first?

4 Success by January

What would you need to see by mid-January to call this worthwhile? Is there a metric you already watch?

5 Constraints

Data sensitivities (including GDPR and residency in EMEA), systems, timing, or organizational factors we should know about.

6 Sponsorship

Confirm touchpoints: mid-point readout (week of Dec 14), capstone (week of Jan 11), and a day-to-day contact.

AFTER THE MEETING

Intake Summary

Complete within 48 hours, send a short recap to the president, and bring this summary to Session 2.

ITEM	SUMMARY
Priority (in their words)	
Decision affected	
Decision maker(s)	
SMEs to engage first	
Success by January	
Constraints and data sensitivities	
Sponsor touchpoints agreed	
Day-to-day contact	

Draft problem statement

Complete the sentence. Your pod will refine it in Session 3.

PROBLEM STATEMENT

_____ (decision maker) needs to _____ (decision)

for _____ (scope), which today is hard because _____.

Success by January looks like _____.
